EXCELLENT PERFORMANCE

This lightweight general-purpose dielectric earmuff is ideal for daylong use and suitable for most industries other than the loudest noise levels. The Model 5000 is easily adjusted but retains your chosen position with the innovative 'twist and lock' mechanism.

EXCELLENT COMFORT

The centre mounted cups provide excellent adjustability and an evenly distributed pressure, this is enhanced by the broad, deep, soft cushions that help give an excellent seal. For additional comfort why not choose the Model 5000C with the added advantage of the soft headband cushion.

EXCELLENT VALUE

No compromise has been made in the stylish design of the Model 5000, which delivers all the benefits whilst maintaining a low cost. The excellence of construction will lead to a long service life, which will deliver the best total cost of ownership in the market.

The Model 5000 is also available as the Model 5000C which comes with a headband cushion.
